

Dhiraj Sambhaji Durgade

darshandurgade1234@gmail.com

Professional and skilled software engineer with strong expertise in backend development.

Raw Experience (Provided)

■ Passionate and motivated software developer with six months of hands-on experience in developing Django applications. Proficient in Python and skilled in frontend technologies including HTML, CSS, JavaScript, and the Bootstrap framework. ■ Goal: Secure a full-stack development or backend development internship at a leading MNC, where I can contribute my skills and continue to grow as a developer. ■ Recently, I completed a week-long internship at DX RAD Private Limited in Sangli, where I utilized Bootstrap Studio to enhance my frontend development skills. While this experience was invaluable, I am currently focusing on mastering Python and Django, alongside advancing my knowledge in Data Structures and Algorithms through two comprehensive Udemy courses by Dennis Ivy and Elshad Karimov. ■ I have successfully completed two projects using the Django framework and SQLite for database management: Poly Community: A resource hub for diploma polytechnic students, providing notes and study materials with a user-friendly interface. Devsearch: A platform for showcasing developers and their projects, featuring search, voting, and commenting functionalities. ■ Eager to leverage my technical expertise and enthusiasm for innovative projects to make a meaningful impact.

Raw Skills

Python, Django, Django Channels, REST APIs | PostgreSQL, Redis, Celery | Docker, Git/GitHub, CI/CD | Elasticsearch | Building Real Projects
